

ALPS product range comparison table

- ALPS processors simply control *perceived volume levels* - powerfully if needed, yet without destroying production values
- ‘Sure-Level’ algorithm controls levels promptly, *without* changing the spectral balance and *without* annoying artefacts
- Simple intuitive operation. Dial in the precise amount of level *consistency* you need - with ease
- Huge ‘*capture range*’. Handle the real-world range of levels that simple compressor-limiters cannot cope with!
- Advanced fully-digital processing is synchronous with source; software servo loop *eliminates jitter*

Product	Pictures	Applications	Additional Features	UK Price
Podblaster		Podcasting Radio OB's Cable TV Educational Worship	<ul style="list-style-type: none"> • Balanced analog I/O on ¼" sockets • Digital I/O (S-PDIF) • USB setup with GUI • 9 presets 	GBP £ 425
